Now Equipped With

Enhanced Ease of Use

New UV Smart Connect™ Cloud Communications

Cloud-based analytics: UV Smart Data web portal captures usage analytics, device diagnostics and automated alerts to inform where, when and how your devices are working.

Dual network connectivity via cellular and WiFi communications.

Automatic data transfer to the cloud, real-time device health monitoring and notifications.

Remote device monitoring for 24/7 service support

Remote or onboard operation in a few taps

Onboard battery for offline communications capabilities.

Automated over-the-air (OTA) updates to ensure continuously improved device operation.
